STEELSMART DECK™

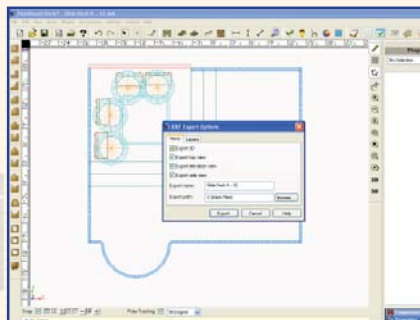

SteelSmart Deck™ Software - The Evolution of Deck Design

SteelSmart Deck™ (SSD) is a powerful step forward in the evolving generation of software applications aimed at a full automation of the process of deck system design. Combining the latest in deck software technology with the versatility and strength of cold formed steel, SSD provides both homeowners and professionals alike with a simplified tool for taking their designs to the next level.

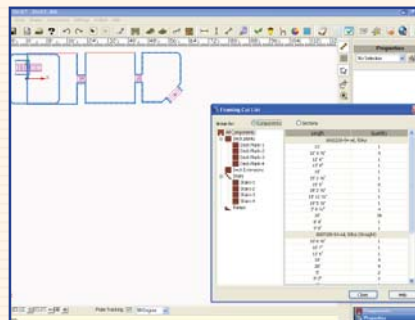

SteelSmart Deck™ is loaded with powerful features and functions, seamlessly integrated to make deck system designing an easy, straightforward process.

- **Create and save deck layouts, step extensions, ramp and stairs**
- **Export CAD drawings** of the deck design
- **Select/customize color layouts** quickly and easily with just a few clicks of the mouse
- **View real-time updates** in the sub-structure with each change of the deck configuration
- **"3D-Anytime" function** allows for immediate 3D views of a deck whenever a change is made
- **Unlimited multiple levels** and real-time elevation adjustments
- **Review and print project reports** during any stage of the design
- **Create and view a materials/cut list**
- **Add railings, tree cut-outs, and other modifications**

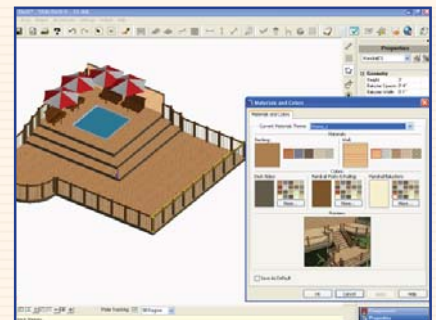

SteelSmart Deck™ software is available at no charge for the layout of any deck, providing an engineered steel materials list in a user-friendly interface. Simply email or upload a completed SteelSmart Deck™ design file to The Steel Network for a free materials quote.

DURABILITY...

STEELSMART DECK™

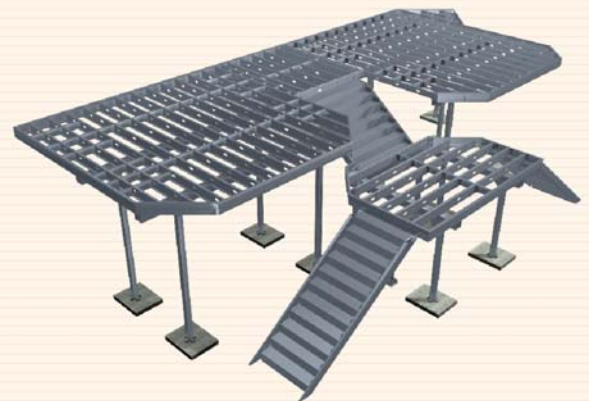

Your House Should Last A Lifetime... Why Not Your Deck?

Steel is rapidly becoming one of the most commonly-used building components. Its durability and versatility provide a superior material when compared with pressure-treated wood. On average, wood decks have a functional life span of 10-15 years, creating added expenses in maintenance and renovation. A steel framed SteelSmart Deck™ provides a support system that will last a lifetime.

Premium decking products require a premium substructure. Use SteelSmart Deck™ to support premium decking products.

The Steel Network's products provide a distinct advantage when compared with wood as well as other commercial construction products. Each SteelSmart Deck™ item is galvanized G-90 for added protection against the elements.

The Value of Steel Framing Products by The Steel Network

Fire Safety	Non-combustible – does not burn or contribute fuel for the spread of fire.
Pests	Impermeable to pests, termites, vermin.
Material Life	Does not warp, is always straight; rust resistant; will not rot; does not expand or contract when exposed to moisture.
Strength	Higher strength-to-weight ratio than wood, structural steel or concrete.
Mold	Not vulnerable to any type of fungi, including mold or other organism.
Liability	TSN Products are engineered to meet project specifications and manufactured from mill-certified steel.

Steel framing components of SteelSmart Deck™ are provided by The Steel Network, Inc.

The SteelSmart Deck™ support structure is intended for use with natural wood or man-made decking and should not be used in contact with pressure treated wood.
